Application/Control Number: 09/996,617

Art Unit: 1635

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method for identifying a compound which modulates the interaction between CARD-7 and CARD-5, classify abled in class 435, subclass 4.
- II. Claim 12, drawn to a method of treating a disorder associated with inappropriate apoptosis via modulation of the expression or activity of CARD-7, classifiable in class 514, subclass 2.
- III. Claim 13, drawn to a method of treating a disorder associated with the inappropriate apoptosis via the modulation of the expression or activity of CARD-8, classifiable in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions (II and II) and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to the use of a materially different gene product. Inventions I and II are drawn to CARD-7 and invention III is drawn to CARD-8. CARD-7 and CARD-8 are proteins that have different structures

Application/Control Number: 09/996,617

Art Unit: 1635

(sequences) and have specific biological properties that are not shared. Neither protein would interchangeable for any particular method, for example.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are mutually different methods. The two methods comprises different methods steps where these step lead to different ends. The method of Group I, for example, results in the identification of a compound that modulates the interaction between CARD-7 and CARD-5 and the method of Group II ends in the treatment of a disease or condition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1635

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean R McGarry whose telephone number is (703)305-7028. The examiner can normally be reached on M-Th (6:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John LeGuyader can be reached on (703) 308-0447. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
